

Hi, I'm Sandeep Ranjan

Data Analytics | AI & Automation | Enterprise Technology

I'm a technology professional passionate about **Data Analytics, Artificial Intelligence, Automation, and solving real-world problems through technology.**

My experience spans **enterprise applications, LMS platforms, integrations, APIs, incident management, and automation**, while I'm actively building my expertise in **SQL, Python, Data Analytics, Business Intelligence, Machine Learning, and Generative AI.**

I believe in learning by building — turning ideas into practical projects and continuously improving them.

About Me

-  Technology professional with experience in **Enterprise Applications & LMS**
 -  Currently focused on **Data Analytics & Business Intelligence**
 -  Working with **Python, SQL, Pandas & NumPy**
 -  Exploring **Power BI, Tableau & Data Visualization**
 -  Interested in **Machine Learning, Generative AI & AI-powered applications**
 -  Experience with **APIs, Postman, Boomi & enterprise integrations**
 -  Interested in **Automation and intelligent workflows**
 -  Continuous learner who enjoys building practical projects
 -  Long-term goal: Build expertise at the intersection of **Data + AI + Business**
-

Tech Stack

Data & Analytics

```
<p>       </p>
```

AI & Machine Learning

```
<p>     </p>
```

Enterprise & Integration

<p> </p>

LMS & Learning Technology

- Cornerstone OnDemand (CSOD)
- EdCast LXP
- LMS Administration
- Learning Integrations
- Training & Content Management

Featured Projects

Portfolio Risk Analytics

An analytics engine focused on quantitative portfolio analysis and investment risk.

Includes:

- Markowitz Portfolio Optimization
- Efficient Frontier
- Monte Carlo Simulation
- Value at Risk (VaR)
- Portfolio Risk Analysis

Tech: JavaScript • Quantitative Finance • Data Analytics

EMI Smart Advisor

An AI-powered personal finance project designed to analyze loans, EMI structures and prepayment strategies.

Focus Areas:

- EMI calculations
- Loan analysis
- Prepayment scenarios
- Financial decision support
- Personal finance analytics

Tech: Python • AI • Financial Analytics

Hospital Finder

A project designed to help users identify and explore hospital-related information.

Tech: Java • Application Development

Case Study Projects

A collection of practical case studies focused on understanding business problems, analyzing data and developing technology-driven solutions.

Focus Areas:

Data Analysis Business Analytics Problem Solving Case Studies

Currently Learning

```
SQL
↓
Advanced SQL
↓
Python for Data Analytics
↓
Statistics & EDA
↓
Power BI / Tableau
↓
Machine Learning
↓
Generative AI
↓
AI-powered Data Applications
```

My Current Focus

I'm currently working toward becoming a strong **Data & AI professional** by combining my enterprise technology experience with modern analytics and AI capabilities.

My focus areas:

 Data Analytics
 Python
 SQL

- 📊 Power BI & Tableau
 - 🤖 Machine Learning
 - ✨ Generative AI
 - ⚙️ Automation
 - 🔌 APIs & Integrations
 - 💡 Real-world Problem Solving
-

What You'll Find Here

This GitHub is my **learning + building playground**.

You'll find projects around:

- 📊 Data Analytics
- 💰 Financial Analytics
- 🤖 AI & Machine Learning
- 🐍 Python
- 🗄️ SQL
- 📊 Business Intelligence
- ⚙️ Automation
- 🔌 APIs & Integrations
- 🧪 Experiments & Case Studies

I'm continuously adding new projects as I learn and experiment with new technologies.

</p>

My Philosophy

Learn → Build → Fail → Improve → Repeat.

I believe technology becomes meaningful when we use it to solve **real problems**.

I'm constantly learning, experimenting and building — one project at a time.

★ **If you find something interesting here, feel free to explore the repositories and connect with me.**

 **Let's build something useful.**
